- [Web Portfolio](#)

Professional Summary

Web Developer focused on Front-End and Full Stack applications, specialized in creating responsive interfaces, API integration, and developing modern web solutions. Practical experience with React.js, Node.js, Git/GitHub, and strategic use of Artificial Intelligence for process optimization, prototyping, debugging, and accelerating the software development lifecycle.

Professional Objective

Work as a Front-End / Full Stack Web Developer, contributing to the development of modern, scalable, and user-oriented applications by applying best development practices, systems integration, and web-focused technologies.

Academic Background

- Software Engineering | UNILESTE | (Currently attending 5th semester)
- Building Technician | CEFET-MG | Completed
- English Course | Info.com | Completed

Professional Courses

- Complete Python Training: From Zero to Artificial Intelligence | Udemy | In Progress | Udemy | Cursando
- FIGMA TIC in Tracks | UNILESTE | Completed
- Leadership: How to Develop High-Performance Teams | SEBRAE | Completed
- Leadership in Team Management | SEBRAE | Completed

Technology Stack

Front-End

- HTML5
- CSS3
- JavaScript ES6+
- React.js
- Responsive Design
- UI/UX
- Figma

Back-End

- Node.js
- Express.js
- Python
- APIs REST
- **Banco de Dados**
- MySQL

Ferramentas & Tecnologias

- Git & GitHub
- Vercel, Render & Supabase
- Arch Linux
- SAP & E-Fornecedores
- Pacote Office Advanced
- Cursor IDE & VSCode IDE

Artificial Intelligence Applied to Development

- Use of AI for task automation and development workflow optimization
- Prompt engineering applied to software development
- Use of AI for debugging, prototyping, and assisted code generation
- Integration of AI tools into the web development process
- Increased productivity with AI-assisted development tools

Professional Experience

COLÉGIO GENOMA TIMÓTEO

IT Analyst. – Jul/2025 – Present

Responsibilities:

- Corporate technical support and systems maintenance
- Management of users, groups, and emails
- Server installation and management
- Network troubleshooting and issue resolution
- Configuration and integration of devices in corporate environments
- Data analysis and identification of operational improvements
- Technological support for multimedia and audiovisual infrastructure

NM ENGENHARIA

Planning Technical Assistant - Fev/2024 – Jul/2025

Responsibilities:

- Development of management reports and data analysis
- Technical support and maintenance of corporate systems
- Installation and updating of internal systems
- Network infrastructure support and troubleshooting
- Management of measurements and internal processes in the E-Fornecedores system
- Preventive and corrective maintenance of equipment

Projects

React.js Portfolio Web

- Development of a modern and responsive interface
- SPA application using React.js and Node.js backend
- Deployment performed on Vercel

Invoice Issuing Platform in React.js with Node.js/Express

- Web system under development using React.js, Node.js, and Express
- REST API structuring
- Development focused on business workflow and usability
- Deployment performed on Vercel, Render, and Supabase

Online Resume Generator

- Full Stack application with React.js and Python
- Dynamic real-time resume generation
- Frontend/backend integration

Institutional Website for Church

- Development of a responsive institutional interface
- Use of HTML, CSS, and JavaScript
- Visual structuring and optimized navigation
